Complete Maxi-Klekk

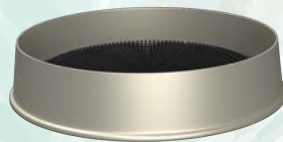

Maxi-Klekk

Fish Egg

Yolk Fry

Simulated River/Stones

Top Drain & Water Pump

**Maxi-Klekk** is made of glass fibre reinforced polyester.

**Maxi-Klekk** is supplied as an independent unit and can be placed as required.

A **glass fibre** base can be supplied and the equipment can be stacked for storage.

**Maxi-Klekk** can be supplied for fitting into existing tanks/pools using existing water and outlets.

**Maxi-Klekk** has a capacity of 15-18 litres of eggs. This will potentially give upto 75-90.000 living smolt.

**Maxi-Klekk** can be rotated easily and can be operated from one side.

**Yolk Fry** can easily be tapped from a separate tap pipe in the base, or by leading the outlet to an external weaning tank.

**Maxi-Klekk** has been developed in cooperation with the fish farming industry and has a great production capacity. Can be operated simply and efficiently. Hatched yolk fry can be tapped/removed very easily.
